ABOUT ME

Motivated 3rd-year Software Engineering student at NTU Faisalabad with practical experience in business analysis, software project management, front-end development, and digital solutions. Passionate about bridging the gap between business needs and technology while delivering user-focused experiences. Eager to contribute to real-world projects and further develop my skills in Business Development, Software Project Management, and Front-End Development.

WORK EXPERIENCE

Digital Soft

Business Development | Software Project Manager | Front-End Developer

[10/06/2026 – Current]

- Contributed to business development activities and client communication.
- Assisted in software project planning, coordination, and task management.
- Built responsive web applications using HTML, CSS, and JavaScript.
- Developed interactive user interfaces and optimized user experience.
- Applied problem-solving and collaboration skills to support project success.

PROJECTS

Hair Treatment Assistant

- Developed a web-based application that provides personalized hair treatment recommendations using Machine Learning.
- Implemented user authentication, progress tracking, reminders, and a community forum.
- Utilized MongoDB for database management and storage of user and treatment data.

Airline Booking System

A C++-based application developed to manage flight bookings, passenger records, and reservation details. The system enables users to book flights, cancel reservations, and manage travel information through an efficient and user-friendly platform.

Agentic AI: Video Automation Agent

An AI-based automation project developed to generate and manage video creation workflows. The system automates content generation, processing, and video production tasks using Agentic AI concepts.

Rental Pro Application

A mobile application developed using Dart and Firebase to manage property rentals, tenant information, and rental activities. The system provides a simple and efficient platform for rental management and communication.

Scholarship Portal

An AI-powered portal developed using Python that helps students identify suitable scholarship opportunities based on eligibility criteria. The system supports scholarship recommendations, profile analysis, and application management.

Spotify Developed a Spotify-inspired music application using data structures and API integration. The system allowed users to browse and select songs, and upon selection, the corresponding tracks were opened and played on YouTube, providing a seamless music discovery experience.

Sales Dashboard Developed an interactive sales dashboard using data science techniques to analyze and visualize sales performance. The project involved data cleaning, exploratory data analysis (EDA), and creating insightful visualizations to identify sales trends, monitor key performance indicators (KPIs), and support data-driven decision-making.

CERTIFICATIONS

[NAVTTC, 24/05/2026]

Advanced Python Programming & Applications

EDUCATION AND TRAINING

BS Software Engineering

National Textile University, Faisalabad [03/09/2023 – Current]

City: Faisalabad | **Country:** Pakistan | **Field(s) of study:** Software Engineering

Intermediate

Alley College, 204 Chak Canal Road, Faisalabad [16/06/2021 – 16/05/2023]

City: Faisalabad | **Country:** Pakistan | **Field(s) of study:** FSc pre-engineering

Matriculation

Girls Govt High School, Faisalabad

City: Faisalabad | **Country:** Pakistan | **Field(s) of study:** Biology

HOBBIES AND INTERESTS

Book Reading

Playing Badminton

Web Development

SKILLS

Business development / Software Project Manager / Web Development / C, C++, C# / Python (computer programming) / Dart programing language / Github

Organizational Skills
